Professor T. M. Sonneborn
Department of Zoology
Indiana University
Bloomington, Indiana

Dear Sonneborn:

I do not see any reason why the review paper prepared for the Advances in Genetics should disqualify you as a participant in the Symposium. The symposium paper is expected to be shorter (about 10 printed pages), and to have the emphasis on your own current work. The title on the tentative program is in this particular case just a space-filler, and it is entirely up to you to decide on the topic. I see no reason why there should not be some overlap with your previous publications. If I do not hear from you to the contrary I will assume that you will take part in the Symposium. Enclosed is a copy of the Notice to Participants, containing directions for the preparation of manuscripts.

I cannot promise as yet that we will be able to accommodate your family during the Symposium. We anticipate that a considerable number of scientists will wish to participate in discussions, and since we will not be able to take care of more than about 70 persons we are facing the problem of limiting the group to that number.

With best regards,

Sincerely yours,

M. Demerec
